

# A Fully Connected TMS

3Gtms delivers a cloud-based, end-to-end transportation management solution that saves time and money for all truckload, less-than-truckload, and parcel shipping needs for shippers, 3PLs, and brokers.

*Apply the power of Fully Connected Transportation Management Software to your business and centralize all your logistics needs from order creation to delivery. Using 3Gtms will enable your business to cut costs, save time, and simplify your supply chain operations.*

## Drive into the future with our Fully Connected TMS

- Multimodal domestic TMS with multi-stop TL, LTL, and pool distribution optimization
- Executable algorithm that lives within the system
- Cloud-based connectivity to platforms that power productivity
- Integration into any other system, including ERP, WMS, BI tools, and more
- Customer and carrier contract management
- Carrier execution (web service, EDI, carrier portal, email)
- Full visibility into shipping ecosystem with status tracking and automated alerts
- Freight audit, settlement, eMatch, Pay, and Auto-Pay
- Vendor and customer collaboration with web services and APIs
- Operational and scorecard reporting

### Business Benefits

**Grow your business with a true partner by your side:** Experience white glove implementation and service focused on setting expectations, honest communication, and solving your problems

**Save time with streamlined logistics processes:** Automate repetitive tasks, enable exception-based management, and make the complex simple

**Operate with a Fully Connected cloud-based TMS:** Utilize robust TMS functionality that seamlessly connects to existing ERPs, WMSs, BI tools, load boards, carriers, and other supply chain technologies

**Execute TMS functions from a single platform:** Perform all shipping, managed services, and broker tasks from one interface using a single source of truth

**Reduce costs across modes and carriers:** Receive built-in rate shopping, load consolidation, routing, and freight settlement
