

HOW CAN OPEN SKY GROUP HELP ME?

- Concerned about a larger software implementation?
- Looking for Tier 1 supply chain software expertise you may not have in-house?
- Feeling the pain of an outdated system that can't keep up with your business changes or is so highly customized that your people just work around it?

Open Sky Group, global specialists in the Blue Yonder supply chain platform (formerly JDA RedPrairie Software), helps companies like yours implement and upgrade warehouse, labor and transportation management systems.

- Typical software implementations or upgrades with Open Sky Group are four to six months.
- On average, clients who upgrade their software with Open Sky Group experience a 30% maintenance cost reduction because they're no longer supporting unnecessary software customizations.

As the largest, dedicated Blue Yonder WMS Implementation partner and one of the first accredited for WMS, Open Sky Group is committed to client success.

HOW DOES OPEN SKY GROUP HELP CLIENTS GET MORE?

- Challenging the traditional approach to software implementation, Open Sky Group has pioneered its own templated method that includes pre-built configurations and integrations and strongly discourages modifications, which means less risk and lower costs for your company because the software isn't being modified.
- Open Sky Group continually invests in [early adoption of the newest versions of the Blue Yonder supply chain platform](#) so that you get to work with knowledgeable experts who can help you get the most from your software investment.
- Open Sky Group maintains an excellent relationship with Blue Yonder which means you benefit from that collaboration continually throughout the life of your project and beyond.
